TO MY FATHER,

ROBERT BARNES, M.D.,

IN HOMAGE TO HIS ERUDITION IN THE SCIENCE, AND IMPROVEMENTS IN THE PRACTICE, OF  
OBSTETRIC MEDICINE, AND IN GRATEFUL RECOGNITION OF HIS  
PROFESSIONAL PRECEPTS AND EXAMPLE,

THIS WORK

Is Respectfully and Affectionately Inscribed.

## P R E F A C E .

---

IN consenting to undertake the compilation of a Dictionary of words used in German medical literature, I was well aware of the many difficulties, some of them insurmountable, which would beset the task. One of the chief of these was the collection of the ever multiplying legion of new words. I cannot pretend to have brought all these together; it is impossible to do more than gather up those which have been more or less recognized in the course of a few years' existence.

Another difficulty was to determine whether or not a word had grown so old as to become obsolete, and therefore not worthy of a place in the Dictionary. Where there appeared to be any doubt on this point I preferred to leave the word.

I have endeavoured to include most of the technical words used in Botany, Chemistry, and Zoology, as well as those used in Anatomy, Physiology, Medicine, Midwifery, and Surgery. In attempting this, many words must have escaped notice. Any communication as to the omission of words which should have been inserted will be most welcome, and will be used in the preparation of any further edition.

I should mention that the following glossaries and

dictionaries are those upon which I have chiefly based the present Dictionary:—

“Dictionnaire de Médecine,” Littré et Robin.

Palmer’s “Pentaglot Dictionary.”

Cutter’s “Dictionary of German Medical Words.”

“Dictionnaire Technologique, par une Société de Savants et d’Artistes.”

Kaltschmidt, “Gesammt Wörterbuch der Deutschen Sprache.”

“Dictionnaire Technologique,” Tolhausen.

“Practical German Dictionary,” Blackley and Friedländer.

I have also collected many pharmaceutical words from Flückiger and Hanbury’s “Pharmacographia.” Lastly, the “Nomenclature of Diseases” of the Royal College of Physicians of London has furnished a large number of words which could not have been easily obtained elsewhere.
